SUMMARY

Computer Science undergraduate with strong expertise in **Data Structures and Algorithms**, **Software Development**, and **Full-Stack Development**. Aspiring Software Engineer with hands-on experience in **Artificial Intelligence** and **Machine Learning**, focused on building scalable, high-performance applications using **Python**, **Object-Oriented Programming**, and **Database Management Systems**.

PROJECTS

Spam SMS Detection System 2025

Python, Pandas, NumPy, Streamlit [GitHub](#) | [Live Link](#)

- Designed and developed a scalable machine learning-based spam classification system using **Python**, **Pandas**, and **NumPy** on a labeled dataset of 5,000+ labeled SMS messages.
- Implemented **NLP** preprocessing techniques, including **tokenization**, stop-word removal, stemming, and **TF-IDF vectorization**, to improve feature-extraction efficiency.
- Trained and optimized classification models (**Multinomial Naive Bayes**, **Logistic Regression**), achieving **95% accuracy** and improved precision-recall performance.

ECC vs RSA: Empirical Performance Comparison 2026

JavaScript, Next.js, Cryptography [GitHub](#) | [Live Link](#)

- Performed in-depth comparative performance analysis of **RSA** (2048-bit) and **Elliptic Curve Cryptography** (256-bit) at equivalent security levels.
- Analyzed and benchmarked key metrics, including **key generation time**, **encryption/decryption speed**, and computational overhead across multiple test cases.
- Demonstrated that **ECC** provides equivalent security with up to **50–70% smaller key sizes**, improving efficiency in resource-constrained environments.

TECHNICAL SKILLS

Cloud & Infrastructure: Cloud Architecture Concepts, Virtualization, IAM, CI/CD Basic Foundations, Linux (Basic)

Languages & Databases: SQL, Python, Java, C++, C, MongoDB

Core Concepts: Computer Networks, Operating Systems, DBMS, Distributed Systems, OOP, DSA

Technologies & Frameworks: Express.js, React.js, Node.js, Streamlit, Machine Learning, NLP, HTML5, CSS3, JavaScript

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering (Cybersecurity) 2022–2026

Techno Main Salt Lake, Kolkata CGPA: 7.38

Higher Secondary (CBSE) 2020–2021

Kendriya Vidyalaya Garden Reach, Kolkata Percentage: 76%

Secondary (CBSE) 2018–2019

Kendriya Vidyalaya Garden Reach, Kolkata Percentage: 84%

CERTIFICATIONS/ACHIEVEMENTS

- Completed **AWS Technical Essentials** (AWS Training & Certification), gaining foundational knowledge in AWS architecture, core services, security, and cloud infrastructure deployment (March 2026). [Link](#)
- Completed NPTEL Certification in **Cyber Security**, gaining expertise in **cryptography**, **network security**, and secure communication protocols. [Link](#)
- Completed certifications in **Generative AI**, **Prompt Engineering**, and **GPT-3**, demonstrating knowledge of AI models, **Large Language Models (LLMs)** and real-world AI application development. [Link](#)
- Completed **Agile Scrum** in Practice, understanding **SDLC**, agile methodologies, and team collaboration.
- Solved **250+ Data Structures and Algorithms** problems, achieving a **coding score of 600+** and Institute Rank of 182, demonstrating strong problem-solving, algorithm design, and competitive programming skills. [Link](#)

EXPERIENCE

Founder & Academic Mentor | *The Study Centre Coaching Institute* Jan 2022 – Present

West Bengal, India

- Founded, scaled, and led an educational institute, delivering structured academic programs to 50+ students, driving measurable improvements in student performance and engagement.
- Architected and executed comprehensive curriculum frameworks and personalized mentoring strategies, significantly enhancing student outcomes and academic consistency.
- Delivered high-impact instructional sessions in **Mathematics**, **Chemistry**, and **Programming (C++, DBMS)**, strengthening analytical thinking and technical proficiency.
